Innovative Fuel Solutions for the Modern World

DigitalFuel
SOLUTIONS

User friendly interface for drivers and dispatch.

What is Digital Fuel Solutions?

Digital Fuel Solutions (DFS) is a 100% web-based transportation management and fuel dispatching software. We are a turnkey solution for trucking companies that haul oil and gas. DFS maximizes your company's productivity and allows you to focus on growth by simplifying and automating complex tasks. It combines decades of experience in the fuel business along with the compute power of the cloud to optimize your business. DFS provides dashboards, reports, geofenced triggers, station and driver information at your fingertips, allowing you to quickly and accurately manage your work.

DFS is a cloud-based system that be accessed from anywhere in the world, with an internet connection and a web browser.

DFS is the only platform that offers automated order generation. DFS's proprietary "Load Generator" is an inventory management system that can generate exact loads for your stations in seconds. The Load Generator will improve your efficiency, reduce errors and streamline your business to maximize your profits. DFS also integrates with many other systems allowing full automation of load placing and invoicing.

FEATURES:

Driver Mobile Interface

DFS's mobile driver interface is a device agnostic platform, allowing drivers to access their load information on any IOS or Android device. Our mobile interface was built for easy load and product identification while on the move. It also allows for quick and easy BOL scanning for instant transferring to the back office or emailing to your customers along with a delivery ticket. Our mobile platform allows for Geofencing sites and terminals for real-time location tracking* and automated timestamping of loading, drop times and more.

DFS Mobile allows real-time capture of the following:

» Bill of Ladings (BOL)
» Gross/Net Gallons
» Tank "stick" inches
» Tank Markers
» Station pictures

» Tank pictures
» Driver ancillaries pay entries (wait time, Pump, dead head, etc)
» Communication with Dispatch
» Much more...

Orders Dashboard

The Orders Dashboards is a control panel where distributors, station owners, and fuel haulers have access to information regarding inventory levels, current delivery updates, bols, eta's and load history. Station owners and distributors can be granted the ability to order fuel on-line, significantly reducing the amount of time spent on the phone every day. DFS makes the entire delivery process transparent on-line.

» User friendly
» BOL, gross and net gallons, time loaded and time dropped along with much more information are at your fingertips
» Ability to stop loads to delinquent accounts with one click
» Custom reports for anything you need

* Requires 3rd party integration

Load Generator

DFS offers a state-of-the-art inventory control system that is fully customizable, so even the most complex station will receive exactly what they need. The Load Generator can generate the exact loads needed at the exact time needed. Its proprietary algorithms will determine the best mathematical load for each location every time. No software on the market comes close to the accuracy of our load generator. DFS will level out inventories to ensure your money is working for you; instead of underground in your tanks.

- » Tracks all tank inventory levels for every station
- » Prevents overfills
- » Allows staff to focus on other work
- » Reduce trips to station to maximize efficiencies so it will always generate a full load for each location with proper tank sizes
- » Continuously adapts to stations sales habits
- » Uses inventory data to calculate pumping averages and project future deliveries with exact gallons and delivery times.
- » Automatically configures optimal loads for your stations based on predetermined parameters set by you

The Load Generator is a state-of-the-art inventory control system that is fully customizable, so even the most complex station will receive exactly what they need when they need it.

Dispatch Portal

Say goodbye to the "pen and paper" method. Make your dispatcher's life easier and more efficient with our dispatching software. In this single portal, dispatchers can edit delivery parameters, check inventory levels, and assign deliveries to drivers with just a drag and a drop.

- » User Friendly interface with simple navigation
- » Maximizes the amount of information displayed by using icons and color coding
- » View both day/night drivers on one page. All drivers are visible at one time
- » Up to the minute updates on driver activity
- » Update drivers loads in real time without having to call driver

Integrations

DFS integrates with many 3rd party providers to streamline your business and maximize your investments. We integrate with companies such as Kenan Advantage (KAG), CircleK, TelaPoint/PDI, Quickbooks, World Fuels, Marathon, Murphy, BP, BJs, Caseys, HyVee and many more.
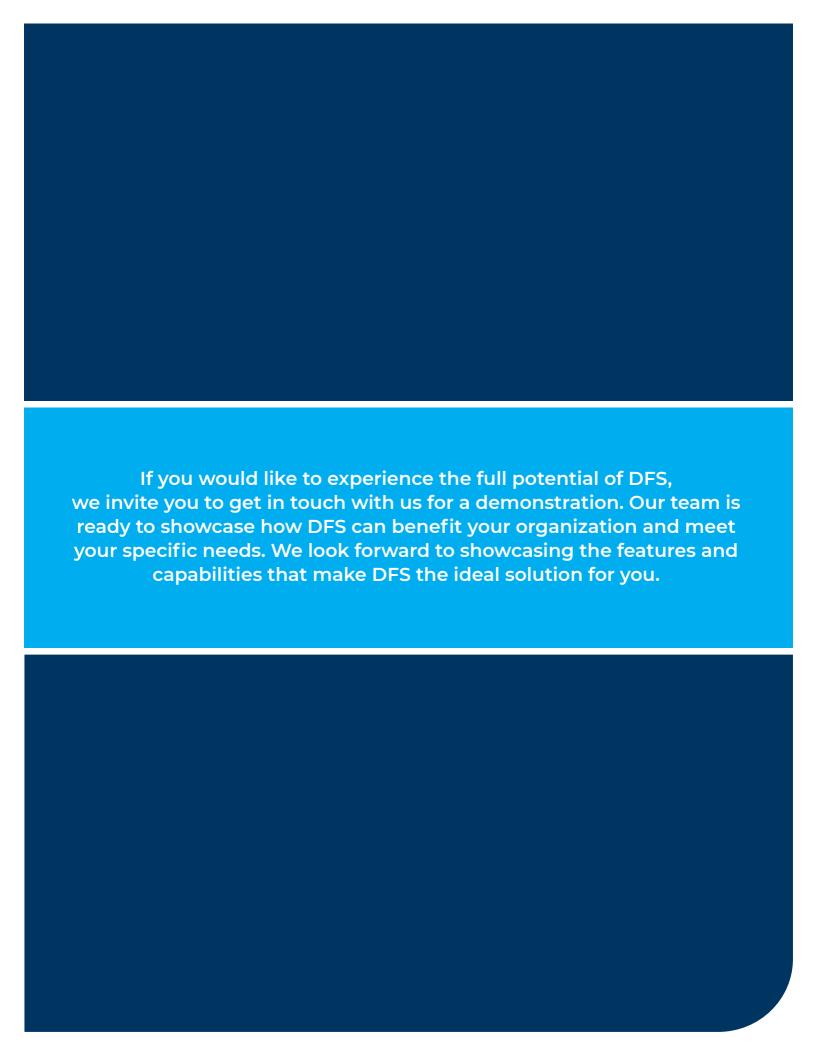

If you would like to experience the full potential of DFS,
we invite you to get in touch with us for a demonstration. Our team is
ready to showcase how DFS can benefit your organization and meet
your specific needs. We look forward to showcasing the features and
capabilities that make DFS the ideal solution for you.
